MODULAIR DUST AND FUME COLLECTOR

A **MAX AIR SYSTEMS FIXAIR-5 MODULAIR** dust and fume collector is shown in the photo above. This unit is available in a variety of sizes ranging from 800 CFM with a single cartridge filter, right on up to 3000 CFM with six filters. This arrangement is suitable for hanging from the overhead roof trusses or it can be installed on a wall or column support. As shown herein, **MAX FLEXAIR** counter-balanced source capture arms are utilized to facilitate the capture of welding smoke from two work stations. The arms in this instance are column mounted, however, the arms could have been affixed directly to the suspended filter unit. The filters can be manually cleaned or internally cleaned through an integrated reverse pulse cleaning system.
