

MAX AIR SYSTEMS

Product Update

DOWNDRAFT TABLE

Our newest addition to the growing family of downdraft tables is the **MAX FIXAIR-DD-5-RA**. This table features unparalleled performance due in part to the non-overloading backward inclined aluminum blower wheel and 5 HP motor, however, it's true secret lies in our highly successful 'pushair' plenum. The effect of a positive downward displacement of filtered air greatly enhances the downflow performance of this table.

Standard features include; protective Plexiglas sides, adjustable backdraft slots, light fixture, starter and cleaning control.

Numerous work surfaces are available including steel, plastic and fiberglass.

DIMENSIONS/SPECIFICATIONS

58" deep, 50" wide, 94" high
Table surface 48" wide by 33" deep
5 HP TEFC motor
230/460/575/3/60
Total filter area of 825 sq. ft.
3000 cfm @ 5.5" s.p.
