

A product of Max Air Systems by Texas Electroniques

## **MAX POWERAIR** DIRECT DRIVE FANS

### **MAX POWERAIR FANS**

Powerful Blower/Motor assemblies are designed for quiet and efficient air handling that render these fans useful for a variety of air moving applications.

Strong steel fan housings along with reinforced aluminium backward inclined blower wheels make the **MAX POWERAIR** fans suitable for low to high-pressure applications where dust, fumes or other similar contaminants need to be transported efficiently.

### **GENERAL SPECIFICATIONS**

- 14 ga. steel construction
- Durable powder paint finish
- 3600 rpm design
- Non-overloading feature
- Direct drive
- Backward inclined wheel
- Quiet and efficient
- Mounting bracket for easy install
- Various voltages to suit any application

### **OPTIONS**

- SILENCERS
- BACK DRAFT DAMPERS
- TWO-WAY DIVERTERS
- DUCTING
- MATERIAL HANDLING WHEELS
